ABOUT US

'Work together, win together'

Established in 2001, Tristone UK Limited is the sole distributor of Tristone® Acrylic Solid Surface sheets, sinks and adhesives in the UK and Ireland.

We aim to work closely with clients offering full support through the supply of samples, literature, technical assistance, customer care and project support. As well as offering practical advice to fulfill every requirement for the solid surface market.

Based in Stockton-On-Tees, we have a wealth of experience and have built up trust within the industry due to our commitment to offering the best service to all our customers.

WHY CHOOSE TRISTONE UK?

We know the solid surfacing market changes frequently. As design trends change, we try to work to bring in new colours and products to stay ahead of those trends. We pride ourselves in providing high quality products, and we aim to go above and beyond to provide the best service for our customers.

Available in over 40 colours, we have refined and perfected our colour range. We wanted to simplify the process of choosing the colour of your Tristone® creation by selecting the best colours from the Tristone® range. Our hand picked colours offer a beautiful finish no matter what the application may be.

The three cornerstone objectives of our business are to provide high quality products and high quality services at competitive prices.

OUR PRODUCT PORTFOLIO

With multiple product ranges, we can provide a comprehensive solution for **#YourTristoneCreation**. From Thermoformed Wash Troughs, to Inlay Stainless Steel Sinks, our product portfolio is always improving and getting better.

- Tristone Acrylic Solid Surfaces
- Cast Sinks
- SYNCRO Inlay Stainless Steel Sinks
- Thermoformed Sinks, Bowls & Basins
- Thermoformed Wash Troughs
- Solid Surface Accessories
- Farecla Accessories
- UNIKA Accessories
- Care and Maintenance Kits
- Sink Waste Kits

MAKE #YOURTRISTONECREATION
A REALITY

THE ONLY LIMIT IS YOUR
IMAGINATION

WHAT IS TRISTONE?

Tristone® is an acrylic solid surface, the ideal material that combines practicality, durability, and elegance. It is the perfect material that enables you to create a one-of-a-kind design for limitless self-expression and design possibilities.

Tristone® is seamless, non-porous, resistant to heat, moisture and bacteria. Tristone® can be thermoformed and joined seamlessly. Additionally, inconspicuous joins, integrated sinks, bowls and covered upstands make Tristone® the perfect choice for both residential and commercial applications.

The design potential for Tristone® is limitless.

Backlighting

Discover the benefits of backlighting with our new Translucent colour range. From prominent and bold light installations to subtle backlighting, Tristone is the ideal product for the practical minded individual.

Future-Proof

By integrating upcoming technologies such as wireless charging and pop up plug sockets into the surface, you can make your Tristone creation future-proof. We offer the flexibility that comes with solid surface products at an affordable price.

Dark Scratch Technology

Our Nebula range scratches darker than conventional solid surface colours. This darker scratch is less visible meaning that you can achieve things that may not be possible with other dark solid surface colours.

Colour Matched to Near Perfection

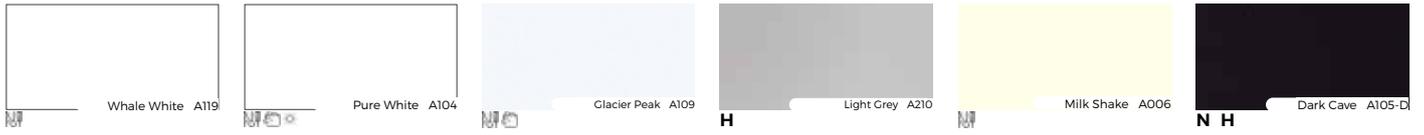

Colour match all your products for a near seamless all-in-one design solution.

Perfect for Large Projects

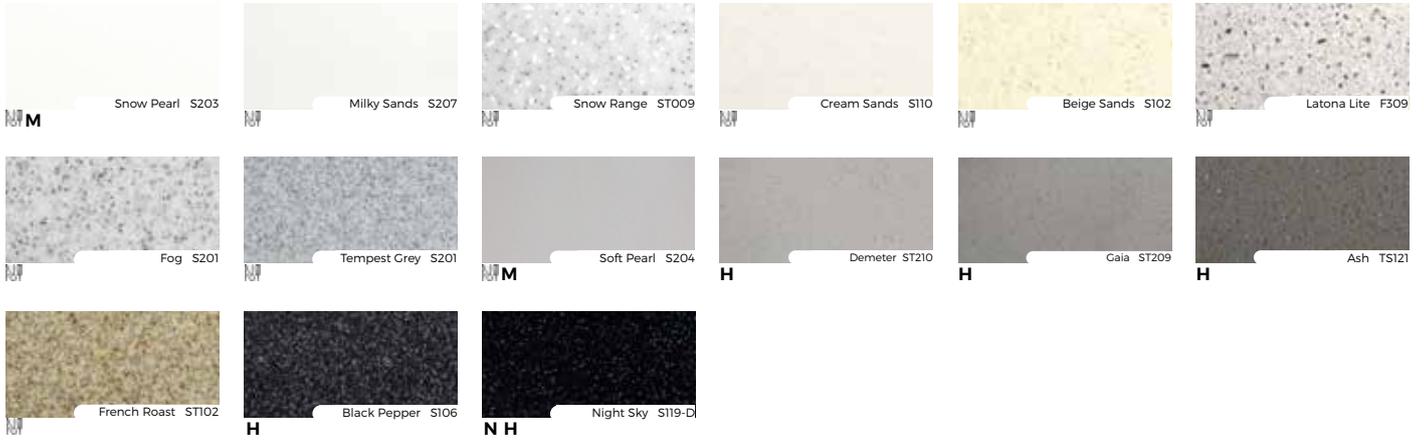

Specifying colours can be hard when you have a colour in mind. This is why we work with our partners to create custom colour solutions that can meet specific design requirements. This is because Tristone colours are customisable, and bespoke colours can be developed for special projects.

KITCHEN

Reimagine your home with our Tristone products ranging from sheet materials to Cast, Stainless Steel and Thermoformed Sinks.

BATHROOM

With our cast bowls, and thermoformed wash troughs, bowls and basins, we are diversifying our range and giving you more options for near limitless self expression.

BESPOKE

Tristone is the bespoke choice for the practical minded individual. It is easy to repair and thermoform meaning you can create specialist projects and products.

COMMERCIAL

Tristone's non-porous acrylic surface can prevent the growth of bacteria and other harmful germs making it the perfect solution for commercial applications.

01

MAKE IT BEAUTIFUL

Tristone Acrylic Solid Surfaces are a beautiful solution for the practical minded individual.

02

MAKE IT RIGHT

With our Tristone Approved Fabricator network, you can be assured that your design project will be completed to a high quality.

03

MAKE IT YOURS

We want #YourTristoneCreation to be special. Individual. Yours. The design possibilities of Tristone are near limitless, and we offer many products to make your future design project a reality.

Home Renovation

Colour

Latona (TS116)

Location

Buckinghamshire

Project Brief

The architect's original brief was to renovate the Grade II listed building with an entrance hall, family living space, kitchen and bedrooms.

The architect was given the task of creating an inviting and liveable atmosphere in the home - but also preserve the 400 year old building complete with thatched roof.

The Project

The contrast between the bespoke French Grey 113 cupboards, which were designed to take into account the unique curvature of the building, and the Latona island unit results in a beautiful centrepiece for their kitchen which includes a solid wood worksurface.

The stunning project's overall outcome captured the attention of Channel 4's Best Laid Plans and the architect won an award at the 2018 Build It Awards in the Best Renovation/Extension Architect category.

Architect: Lynn Palmer Architects

Fabricator: Kingsey Kitchens

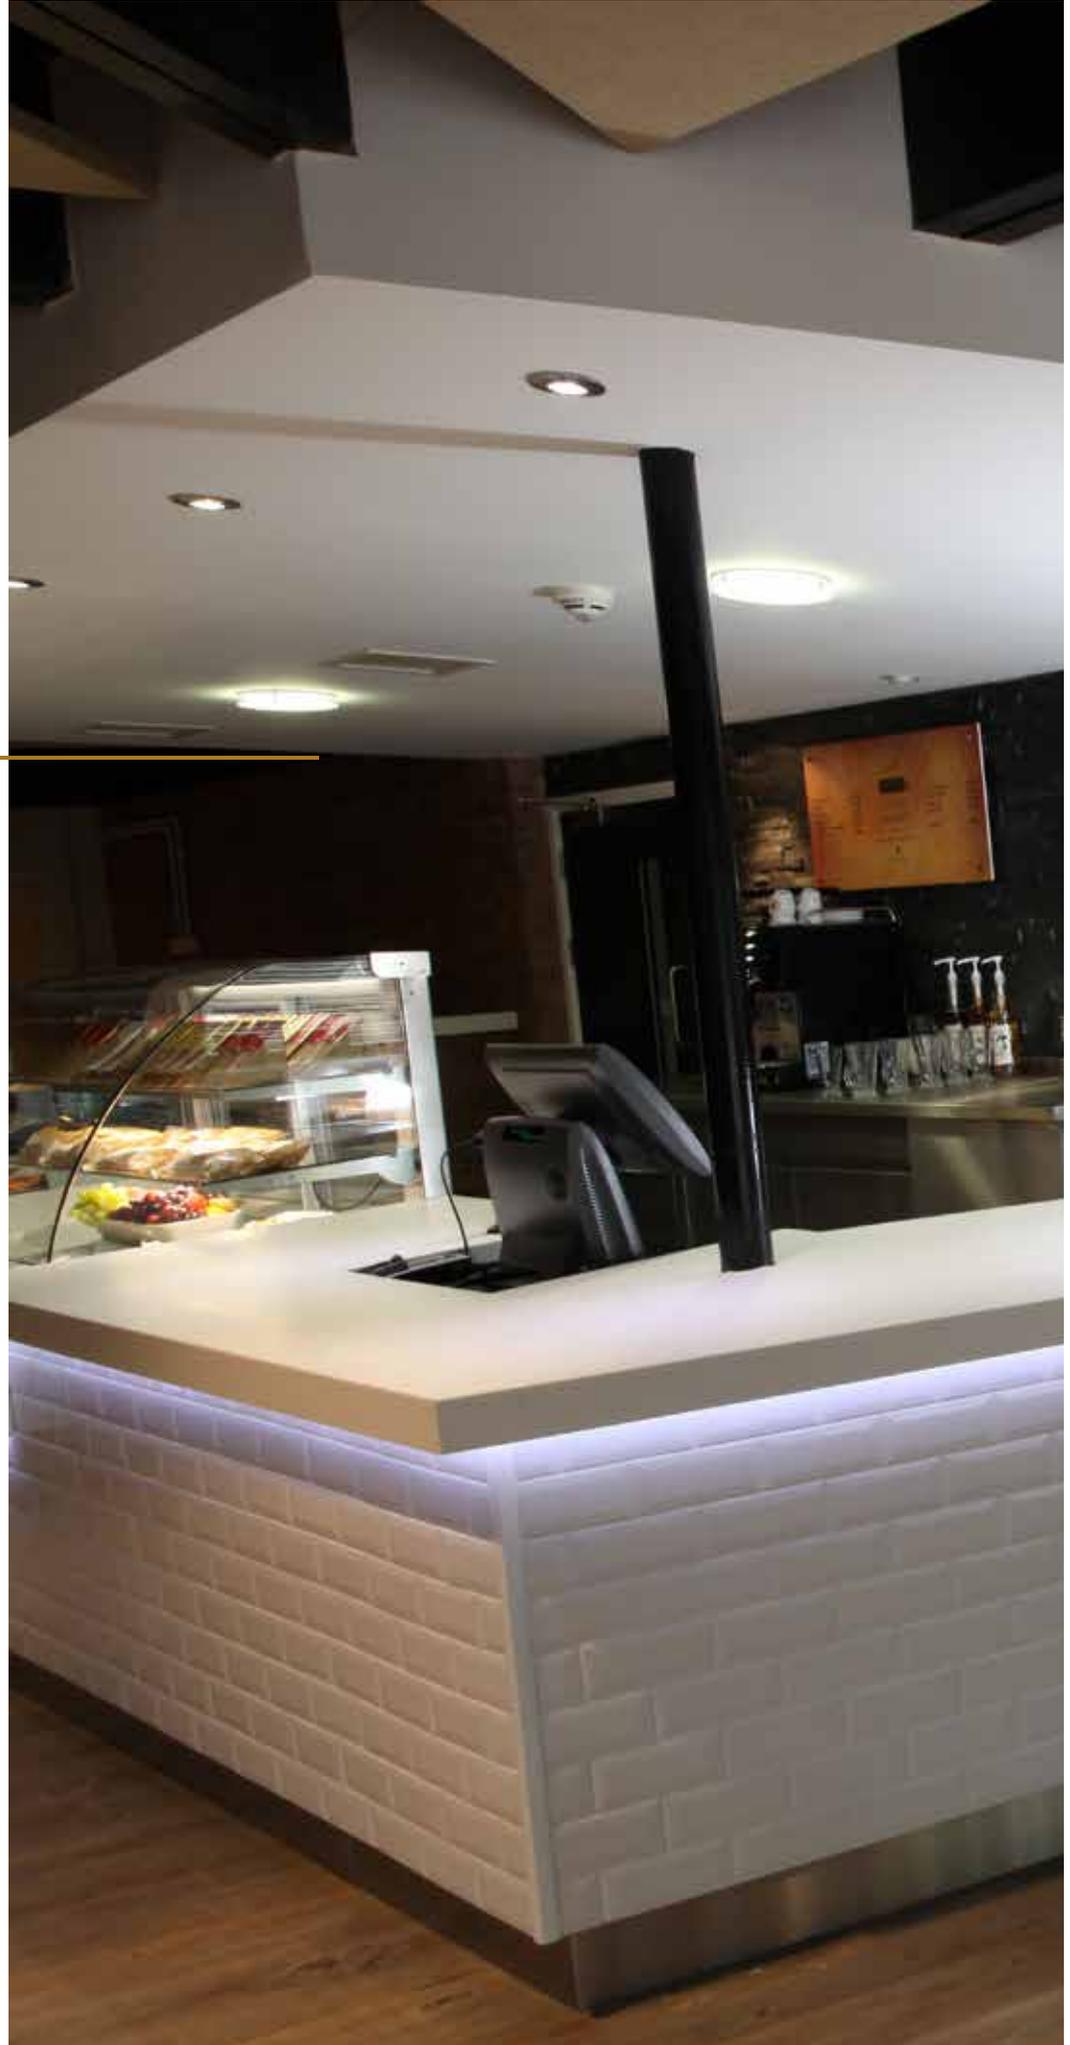

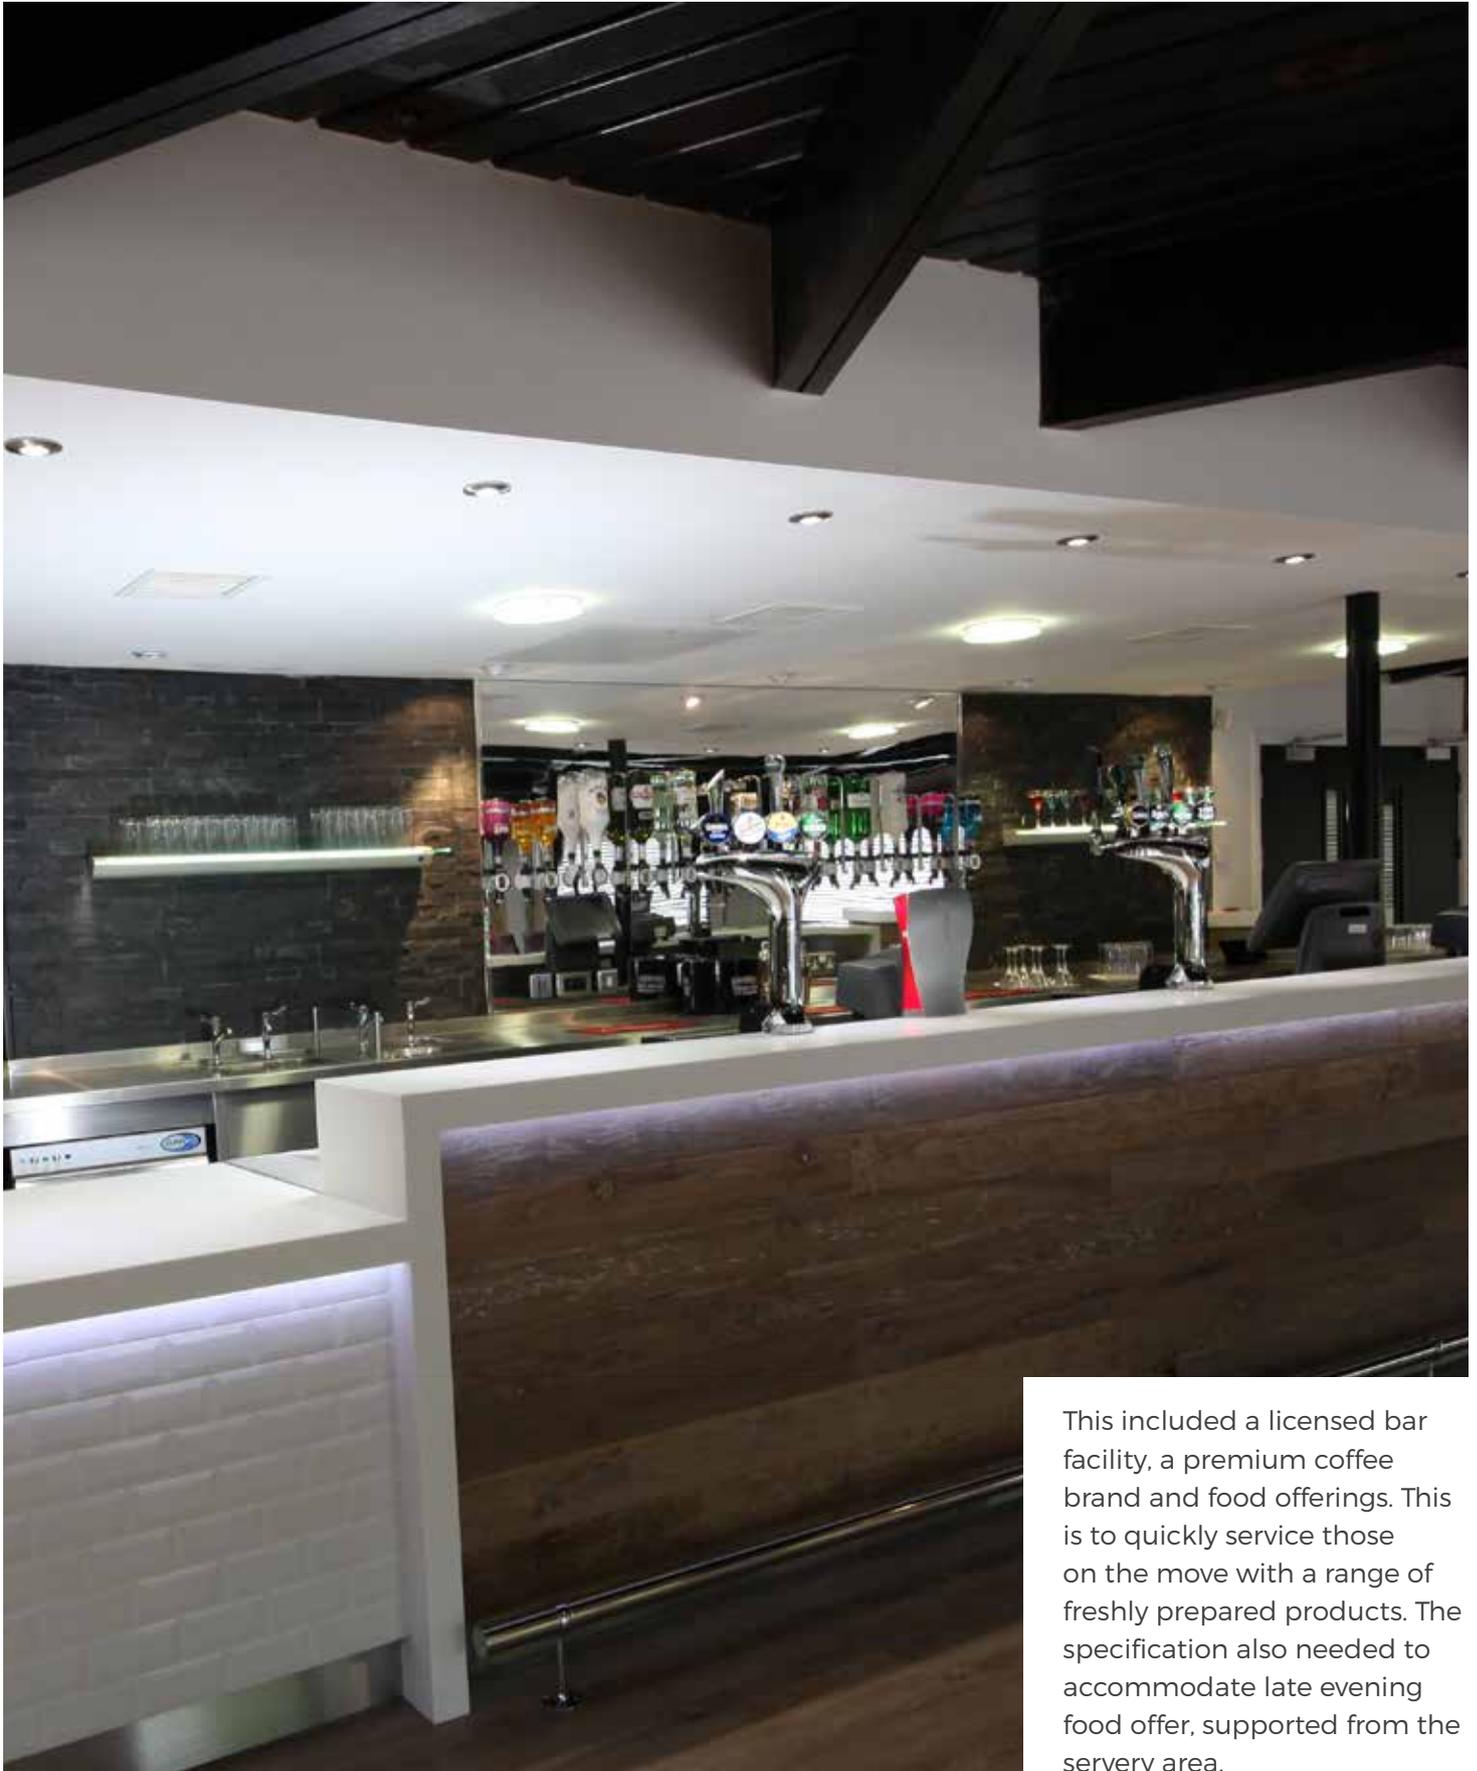

CASE STUDY: STUDENT ACCOMMODATION

Project Brief

To design a modern and contemporary café bar as part of the Lawns Centre development programme, which would be an appealing social space for students to dwell.

Architect: PSV Design

This included a licensed bar facility, a premium coffee brand and food offerings. This is to quickly service those on the move with a range of freshly prepared products. The specification also needed to accommodate late evening food offer, supported from the servery area.

SYNCRO INLAY SINKS

SYNCRO inlay sinks bring together high quality stainless steel sinks with multiple surfaces including: Acrylic Solid Surface, Quartz, or Stone.

Using SYNCRO allows for the finished product to look like a steel based material clad sink. Conventional stainless steel based sinks were joined to Solid Surface material with a silica bonding agent. SYNCRO's inlay stainless steel sinks make your kitchen solution seamless and less prone to leakage.

SYNCRO Sinks are handmade and produced to the highest manufacturing standards. Made from premium 1.2mm, 304 grade stainless steel, SYNCRO offers a luxurious alternative to your standard stainless steel sinks whilst also bringing innovations to make your kitchen more hygienic and beautiful.

Disclaimers and Notices

These diagrams were created and scaled down by Tristone UK Marketing. They are based on technical drawings by the original sink manufacturer. Whilst every effort has been made to ensure the images are to scale, there may be a tolerance of ± 3 mm. For further information, please contact the Tristone UK Office directly. These cabinet compatibility diagrams are based on the dimensions of Cooke and Lewis Standard Cabinets in multiple sizes. Due to the flange on the sinks, there may be additional tolerances that may need to be taken into account when installing into their respective cabinets.

SYNCRO Inlay Sinks give you the added flexibility to pick and choose your sink combination and finish.

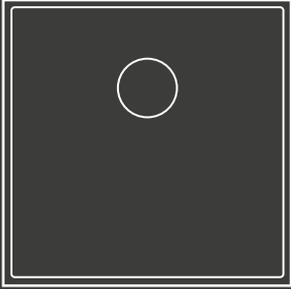

NEAR SEAMLESS

All Acrylic Solid Surfaces offer colour matched adhesives which allow for inconspicuous joins. This means that when SYNCRO sinks are clad, undermounted and joined, it can work with any Acrylic Solid Surface to create a near seamless kitchen solution.

CAST SINKS AND BOWLS

Our Cast Sinks and Bowls are available in various models. They are not only premium quality, but are bacterial resistant and easy to clean and maintain.

Available in white¹, the Tristone Cast Sinks offer a beautiful solution for your Tristone Creation.

Near Seamless

Our cast sinks and bowls can be undermounted or seamed to the worksurface to create a near seamless kitchen solution.

Easy to Clean

Our sinks and bowls are manufactured to have similar properties to our Tristone Acrylic Solid Surface sheets. This means it is hygienic and easy to clean.

Customisable to your specifications

Our cast sinks and bowls can be customised to meet your specifications. Some of our cast sinks are available with or without overflow.

01

Cabinet Compatibility

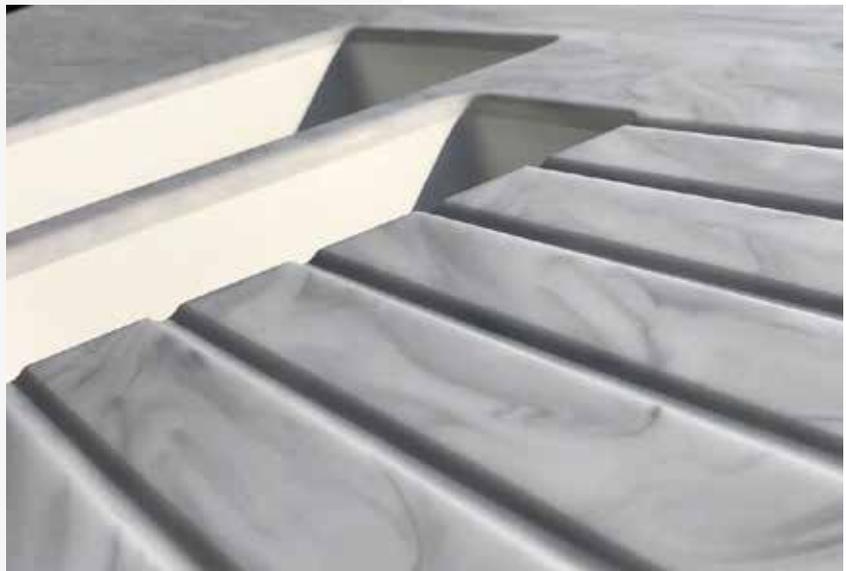

Most of our sinks, bowls and basins are compatible with 600mm standard cabinets.

02

Drainer Grooves

Integrate drainer grooves into the surface which allows for water to drain away from the surface.

03

1 Year Limited Warranty

Have peace of mind and know that our sinks are covered by a 1 year limited warranty.

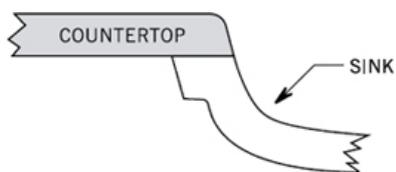

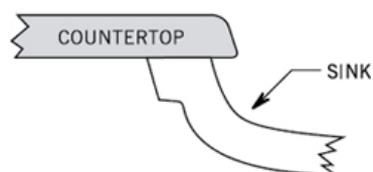

MOUNTING OPTIONS FOR CAST SINKS

The flexibility of our cast sinks allow for different mounting methods which means that you can achieve different finishes. Seam mounts or under mounts can be used to join your cast sink to your worksurface.

Seam Mount

Under Mount

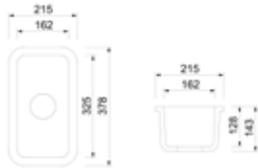

Both options allow for a near seamless kitchen solution which are hygienic and non porous whilst maintaining a simple and beautiful finish. Seam mounted sinks offer a smooth finish between the countertop and the sink whereas the under mounted sinks offer a lipped edge on the countertop.

THERMOFORMED RANGE

Our thermoformed sinks, bowls, and basins are available in our Tristone® UK stock colours. They are made to order and offer the same properties as the Tristone® Acrylic Solid Surface. For a seamless kitchen or bathroom solution, our colour matched sinks and bowls are the perfect way to make your Tristone® creation a reality.

Colour Match Products Available

Thermoformed sinks and bowls are made with Tristone® solid surface sheets, which allows your design to be fully integrated and seamless¹.

Multiple Base Options

Our kitchen sinks come in 3 different base options depending on the model range: Flat Stainless Steel, 20mm Stainless Steel and Solid Surface Base²

Multiple Depths Options

We have 3 depths available for our sinks, bowls and basins. Our sinks are available in standard depth (see dimension images), 170mm, and 190mm.

01

Cabinet Compatibility

Most of our sinks, bowls and basins are compatible with 600mm standard cabinets.

02

Find Your Combination

Get an idea of how your sink can mix and match your sink to fit a cabinet.

03

1 Year Limited Warranty

Have peace of mind and know that our thermoformed sinks are covered by a 1 year limited warranty*.

*Solid Surface bases are not covered by the 1 year warranty.

HOW CAN TRISTONE BE THERMOFORMED?

The chemical properties and composition of Acrylic Solid Surface gives Tristone its thermoforming capabilities. The process for thermoforming can vary depending on the product that is being manufactured.

Acrylic Solid Surfaces are usually heated to 150°C in a thermoforming oven until it becomes pliable and then moulded into intricate shapes and designs using a mould and a thermoforming press.

- Allows for a smooth flowing design¹.
- 3D shapes are possible.
- Maintains the same intensity of colour after being thermoformed.
- The moulded pieces can be joined to create larger installations and displays².

Thermoforming Press

¹The pieces that require thermoforming must have smooth, ground edges to prevent the appearance of chips and microfissures.
²For more complicated sections, moulds of both sides (male and female) can be used to achieve the required shape once they have cooled to room temperature.

COLOUR MATCHED TO NEAR PERFECTION

We work to make sure the colour of the worksurface is as close to a colour match as any thermoformed sinks, bowls and basins you also get from our product range.

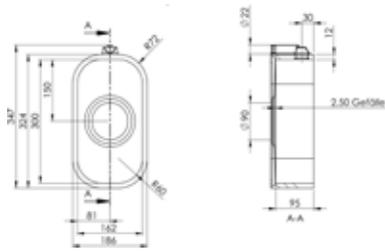

Please Note: For our thermoformed sinks, bowls and basins there is a 14-20 working day lead time.

- 10 x 180 grit sanding discs
- 10 x 240 grit sanding discs
- 10 x 320 grit sanding discs
- 10 x 400 grit sanding discs
- 1 x Light Duty abrasive pad
- 1 x 500ml Solid Surface Rejuvenate
- 1 x 500ml Solid Surface Daily Cleaner

- 1 x Microfibre Cloth
- 1 x Disposable gloves
- 1 x Sanding Foam Pad
- 1 x Abrasive Disc Pad - White
- 1 x Abrasive Disc Pad - Maroon
- 1 x Abrasive Disc Pad - Grey
- 1 x Care & Maintenance Guide

FARECLA PROFILE VECTOR LIQUID COMPOUND

Profile 200XL PRODUCT CODE: P2X101

Profile Vector Liquid Compound is a high performance, water-based cutting compound which removes P1500 or finer sanding marks from acrylics, polyester coatings and gel coats and will reach the level of gloss required in the shortest time. For dry use only.

Product Specifications	
Size	1 Litre
Product Code(s)	P2X101 or PRV101

FARECLA PROFILE FINISH LIQUID COMPOUND

Profile 500 PRODUCT CODE: PRO500-1100

Profile Finish is a very fine finishing compound designed to remove any light swirl marks and holograms from high quality painted lacquered and gel coat surfaces to leave the ultimate high gloss finish. It will not scratch and is particularly good on soft coatings which are susceptible to swirl marks.

Product Specifications	
Size(s)	1 Litre or 5 Litre
Product Code(s)	PRO500-1100 OR PRF101

FARECLA 8" TWISTED WOOL COMPOUNDING PAD

Double Sided

The Twisted Wool Compounding Pad is a 4 ply, 100% wool applicator. It has the highest cut of any applicator. Double sided pads are ideal for when polishing different coloured surfaces or using different products and you do not want contamination.

FARECLA 8" LAMBSWOOL COMPOUNDING PAD

Double Sided

The G Mop Lambs Wool Pad is a 100% natural product (sustainable). It gives a high cut and great finish, depending on the product used.

UNIKA SOLID SURFACE COMPOSITE AND CARE KIT
